

Our stakeholders

We believe that, to be a responsible company and secure our long-term success, MPI must build mutually beneficial relationships with our key stakeholders and take account of what is important to them. This is best achieved through proactive and effective engagement.

By understanding our stakeholders' interests, the Directors have considered the potential impact of our long-term decisions on each stakeholder group and have regard for their needs and concerns when setting the Company's strategy and making decisions.

We set out in the following table our key stakeholder groups, their material concerns and how we have engaged with them throughout the year:
